

Part 1 Words in Context

Passage 1: Tips on Weight Loss U4-1

This is not a **diet**. It's a simple way to lose **weight**. And you don't even have to give up the food you love or join a **gym**. It's about balancing **calories** in tiny ways that add up to big **benefits**. You just need to develop the habits that fit people have. **Stick** with them, and you'll become lean and fit.

1. Morning routine

When you wake up in the morning, sit up slowly without using your hands. With legs straight out, bend forward until you feel sore in your back. It will **burn** about 10 calories.

2. Start with soup

When you have a meal, order a clear soup, and have it before having the main course. In this way, you'll feel fuller, so you'll eat less when the main course comes.

3. An apple (or more) a day

Apples are full of **fibre** and water, so your stomach will **crave** less food. Study shows that people who eat at least three apples a day lose more weight than those who don't.

4. Stand up and walk around

Every time you use the mobile phone, stand up and walk around. Heavy people sit on average two and a half hours more each day than people who are fit. This

skill is especially important as standing up and walking around will burn 50 or more calories. And if you can **step out of** the room to take a short walk **occasionally**, it will be even more helpful.

Follow these four tips, and you will see great results in your weight **loss**.
